

# Erratum for: Why you should not use the electric field to quantize in nonlinear optics

Nicolás Quesada

Equation (22) of Ref. [1] reads

$$\tilde{H}_{NL} = \frac{2}{3} \int d\mathbf{r} \chi^{(2)} \tilde{\mathbf{E}}^3 = -\frac{2}{3} \int d\mathbf{r} \eta^{(2)} \mathbf{D}^3. \quad (1)$$

It should read

$$\tilde{H}_{NL} = \frac{2}{3} \epsilon_0 \int d\mathbf{r} \chi^{(2)} \tilde{\mathbf{E}}^3 = -\frac{2}{3} \int d\mathbf{r} \eta^{(2)} \mathbf{D}^3. \quad (2)$$
